The Consultant Service and Group Medicine, February	75						
Personality and Malocclusion, March	113						
Requirements in Dental Treatment: Biologic and Sociologic Integration; Time and Money, April ..	163						

FROM the beautiful country of Colombia—rich in culture, art and romance of the Spanish Americas, are obtained gold, silver and platinum so useful to the dental profession.

Here also are found two of nature's most exquisite jewels—the mysterious, lustrous opal and brilliant, healthy teeth.

For many years the people of this modern Latin American Republic have used Kolynos to help maintain the natural brilliance of their teeth.

Colombian dentists are familiar with the properties of Kolynos. They recognize this scientific dentifrice as a safe, effective cleansing agent for the mouth, teeth and gums.

THE KOLYNOS COMPANY, NEW HAVEN, CONN.

Better for—

crowns
bridges
inlays
intermediates
fillings
